MARKET REVIEW

MARKET ROUND-UP

Market Review

Global stock markets rose to new all-time highs in September, supported by interest rate cuts by major central banks, while expectations around lower rates in the coming months helped push bond yields lower. The Federal Reserve (Fed) began its easing cycle with a larger-than-expected interest rate cut in September and guided for further cuts this year and next, while the European Central Bank (ECB) enacted its second interest rate cut of the cycle. Economic data overall suggested that a soft economic landing for the US – inflation returning to target with no recession – remains likely. Meanwhile, the market reacted enthusiastically to China’s announcement of stimulus measures.

Equities

Global stock markets rallied to new all-time highs, supported by interest rate cuts by major central banks and expectations of a soft economic landing. The MSCI All Country World index rose by 2.0% (1.5% in euros) in September, with the MSCI USA rising by 2.2% (1.3% in euros). Emerging market (EM) stocks were supported by stimulus measures from China. The MSCI EM index rallied by 5.6% (5.8% in euros), the best monthly performance since November 2023, and supported by a 23.3% (22.9% in euros) gain for the MSCI China index.

Bonds

Eurozone government bond returns were positive due to both yield and capital gains, with the yield of the 10-year German bund down by 16 basis points (bps) over the month, at 2.12%. The ICE BofA 5+ Year Euro Government bond index returned 1.5% in September.

Corporate bonds were supported by falling yields. European investment grade (IG) corporate bonds returned 1.2% as yields fell by 23bps to 3.29%. Global high yield bonds returned 1.1% as yields declined by 18bps to 6.23%.

MARKET OUTLOOK

Irish Life Investment Managers' (ILIM's) view – looking ahead

With inflation having fallen significantly and central banks now suggesting rates will be cut further in 2024, bond yields are expected to decline over the next 12 months. On a 12-month view, our base case is that German and US 10-year government bond yields fall from current levels of 2.12% and 3.79% to 1.50% and 3.50%, respectively. We believe fixed income offers a strong risk-reward profile at this stage in the cycle, with the potential to offer protection if the economy slows, and is attractive from an income perspective while also providing potential for capital gains via falling yields. We believe that the risks of materially higher bond yields have reduced and, if the economy falters, major central banks will be able to cut rates to support growth. In that scenario, we would expect bonds to outperform to a greater extent.

Global equity valuations are above long-term averages, trading on a 12-month forward price-to-earnings (P/E) multiple of 17.9x against a long-term average of 14.6x. Equities remain expensive against both bonds and cash given the high yields currently available on these assets. Despite this, the outlook on a 12-month view is positive. Central banks have pivoted to looser policy in 2024 as inflation has declined. With growth expected to remain firm with a recession being avoided, earnings are forecast to rebound in 2024, which should be supportive. Over the medium term, the rollout of artificial intelligence (AI) should boost efficiencies and earnings across the whole market and allow equities to trade at higher valuation levels. The ongoing green-related capex cycle could also boost earnings over the medium term. Any short-term volatility in markets is likely to be offset by the above factors, resulting in positive returns on a 12-month time frame.

Increasing hopes of growth remaining firm, with a recession being avoided, have been supportive of equity markets. A continued fall in inflation, enabling central banks to cut interest rates further, could contribute to additional gains.

Global growth surprised positively in 2023 at 2.8%, led by a resilient US economy. Growth is forecast to decelerate slightly to 2.6% in 2024. The US economy has been robust, despite some recent moderation in growth, while Europe has struggled as higher interest rates have impacted activity levels and demand. Lower ECB policy rates can help stabilise European sentiment and growth.

After an initial reopening surge in 2023, Chinese growth stalled. The authorities have recently announced a range of additional stimulus measures to boost growth.

Equities are above long-term average valuation multiples but, with positive economic and earnings growth in 2024, can continue to grind higher.

Structural long-term benefits from the AI theme and evidence of earnings being boosted by AI-related initiatives can support higher equity valuation multiples.

Volatility is likely to remain a feature, due to uncertainty over the eventual growth outcome, inflation path, monetary policy and geopolitical events. Modest short-term drawdowns in markets are possible, which could provide opportunities to add to exposures.

SUMMIT GROWTH FUND

The Summit Growth Fund aims to achieve growth by investing exclusively in global equities. From July 2014, equity management has been sub-advised to Setanta Asset Management. Equities are managed under the Setanta Global Equity Strategy.

Fund update for September

The Summit Growth Fund returned 0.96%, net of fund management fee, over September. Consumer Discretionary, Utilities and Communication Services were the best performing sectors, while the Industrials, Energy and Financials sectors lagged over the month. The stocks contributing the most to the fund's return were Oracle, Tencent Holdings, Booking Holdings and Nike. The largest detractors from performance were Samsung Electronics, Berkshire Hathaway, Oshkosh and Electronic Arts.

SUMMIT BALANCED FUND

The objective of the Summit Balanced Fund is to avoid excessive volatility while still providing solid returns over the medium to long term. The Fund invests in global equities but also maintains a minimum of 33% invested in a mix of fixed income and cash. From July 2014, equity management has been sub-advised to Setanta Asset Management. Equities are managed under the Setanta Global Equity Strategy.

Fund update for September

The Summit Balanced Fund returned 0.79%, net of fund management fee, over September. Consumer Discretionary, Utilities and Communication Services were the best performing sectors, while the Industrials, Energy and Financials sectors lagged over the month. The Fed began its easing cycle with a larger-than-expected cut in its key rate in September, and guided for further cuts this year and next, with data overall suggesting that a soft economic landing remains likely. Elsewhere, the ECB cut rates further, and China announced further stimulus measures. Global stock markets rose to new all-time highs in September as expectations around lower rates in the coming months helped push bond yields lower.
